Mr. Robert Tyabji
Director, UNICEF
Sanaa, Yemen

Dear Robert,

Sanaa International School's students and faculty wish to thank you and your staff for very informative and interesting presentations. On the occasion of our "Success Orientation" assembly which emphasized "Concern for Others" the focus on UNICEF's projects was most appropriate.

The movie about development in Bhutan for our elementary students left lasting impressions of what it means for a country to improve the conditions for children and families through cooperation of those inside the country and those from outside the country. Our students especially enjoyed the children from the village acting out the story about the moon and the king and the people of Bhutan.

Our secondary students were similarly impressed by your well executed multi-media presentation of UNICEF work in Yemen. In particular several of the fourth year secondary students who are working on research projects as part of their graduation requirements were able to relate your presentation to aspects of their research efforts.

We all appreciate the quality contribution your presentations have made to our students. Thank you again for a job well done.

Sincerely,

Frank Underhill, EdD
Director for Development
Quality Schools International
